

CROSS-BORDER COSMETICS

Your guide to

Fat transfer to the buttocks

Gluteal lipofilling

Prepared for you

AT A GLANCE

What to expect

Fat is taken by liposuction from the waist, back or thighs, cleaned, and placed in the buttock to change its shape. Under general anaesthetic, two to four hours.

HOSPITAL STAY

2 nights

TIME IN BANGKOK

10 days

BACK TO DESK

WORK

2–3 weeks

ANAESTHETIC

General

PRICE RANGE

AUD 8,000–15,900

2 nights

8 nights

Flight

The price changes with the hospital you choose. The care you get doesn't.

INSIDE EVERY PRICE

- ✓ Surgeon and anaesthetist
- ✓ Compression garments
- ✓ Lymphatic drainage massage
- ✓ Every transfer
- ✓ Three days of a caregiver

BEFORE YOU BOOK

What it asks of you

No nicotine

Before and after surgery. Cigarettes, vapes, patches and gum all count.

Someone at home

For the first fortnight.

A little set aside

For a changed flight or an extra night.

A hospital health check

Weight, blood pressure, diabetes, clotting.

RECOVERY

Day by day

Days 1–2

Two nights in hospital. Sore at the places the fat was taken from more than where it was put. Sitting is off the table from the moment you wake up.

Days 3–7

No sitting directly on the buttocks at all, and no lying on your back. A cushion for the whole trip. Compression on the donor areas day and night.

Days 8–10 · flying home

Reviewed and cleared before you fly. You fly sitting on a cushion, up every hour, and it is not a comfortable flight.

Weeks 2–6

Short periods of normal sitting from about two to three weeks, on advice. The shape keeps changing for six months as some of the fat is reabsorbed — that is expected, not a complication.

YOUR TRIP

From take-off to your front door

01 *Off to Bangkok*

We help book your flights, and a driver meets you when you land.

03 *Meet your surgeon*

Face to face, with time for every question.

05 *Nights in hospital*

Nurses on hand, day and night.

07 *First check-up*

Your surgeon checks how you're healing.

09 *Flying home*

If your date moves, we help move your flight.

02 *Land and settle in*

A quiet night at your hotel, close to the hospital.

04 *Surgery day*

Your coordinator is a message away all day.

06 *Back to the hotel*

A caregiver with you for your first three days.

08 *Cleared to fly*

You fly when your surgeon says you're ready.

10 *Home again*

Your doctor in Bangkok is still a message away.

In full, before you decide

This is the one operation on this site with a death rate worth saying out loud. Fat injected into the muscle can enter a vein and travel to the lungs, and that has killed people. Placed only under the skin and never into muscle, the risk drops by an order of magnitude. So the technique is not a detail, it is the entire safety question — ask what your surgeon does, and get the answer in writing before you pay anything.

The serious one — fat embolism

If fat enters a large vein it can travel to the lungs, and it can be fatal. It is the reason this procedure has the highest death rate in cosmetic surgery. Subcutaneous-only placement, no intramuscular injection, and ultrasound guidance are what reduce it. Ask which of those your surgeon uses.

Unhappy with the result

Somewhere between a third and two thirds of the transferred fat survives, and nobody can tell you in advance which. Asymmetry and a smaller change than you pictured are both common, and a second session is often needed.

A complication

Fat necrosis — firm lumps where fat has not survived — infection, and contour dents at the places the fat was taken from.

The anaesthetic

General anaesthetic, two to four hours, with an anaesthetist present throughout.

Most of it is avoidable. Flying before you are cleared, lifting too early, going back to nicotine, or missing a check.

Every step, arranged

You focus on your surgery and your recovery. We arrange everything around it, from your first question to your last check-in.

Your flights

We help you book them around your surgery date, and help move them if recovery runs long.

Your hotel

Close to the hospital, from options we send you. A companion can share your room.

Your visa, if you need one

Australian passports don't currently need one. For others, we get the hospital's letter.

Every transfer

Airport, hotel and hospital, both ways, arranged by the hospital's team.

A caregiver at your hotel

With you for your first three days out of hospital.

Garments and massage

Compression garments and lymphatic drainage massage, in your price.

A checklist before you fly

What to pack, and what to stop taking and when, from the hospital and surgeon.

Your coordinator

One number to call, from the day you land to the day you fly home.

Your doctor, after you're home

Still a message away once you're back in Australia.

One written price

Everything that's included, in one number, before you pay anything.

Why go through us

The surgeon's registration number, before any deposit

In writing. The register is public, so you can check it yourself.

One price, in writing, before you pay

Everything it includes, said up front.

Your deposit back in full if the surgeon says no

If you're found not to be suitable, it all comes back.

One team, start to finish

One coordinator throughout, and your doctor after you're home.

Your next step is a written quote

Tell us what you have in mind. A person reads it and replies with one price, in writing. Nothing is booked and nothing is payable today.
